SUMMARY

Full Stack Developer with 2.5+ years of experience shipping web and mobile products with React, TypeScript, Java, Spring Boot, React Native and Flutter. Uses AI tools (Claude Code, Cursor, GitHub Copilot) to move fast, while owning code quality, tests and releases from first commit to the app stores.

KEY ACHIEVEMENTS

- Shipped TryThat, a real estate app, to Google Play, where it has **10K+ downloads**.
- Delivered **4+ production apps to the Apple App Store** at Zapplogics, owning releases end to end.
- Built and deployed **5 live products** independently and for clients: banking, blood delivery, real estate, a design studio and a tech services platform.
- Backed JavaBank with **27 JUnit test classes and CI on every push**, plus safe money transfers under concurrent access.

WORK EXPERIENCE

Software Developer · Zapplogics Solution Feb 2024 – Present

- Developed and shipped 4+ production mobile apps with Flutter and Firebase, including a restaurant management app and a PG management app, both live on the Apple App Store.
- Implemented staff shifts, reservations, billing, parking and menu modules for the restaurant app, and member dashboards, payment tracking and maintenance requests for the PG app, with Firebase real-time sync.
- Managed App Store releases end to end, from release builds and review submissions to production rollout.

Freelance Full Stack Developer · Self-employed 2025 – Present

- TryThat** (React Native): shipped the complete UI and REST API integration for property rental and sale listings with search and filters. [Google Play](#)
- Hyphn** (React, Supabase, PostgreSQL, AWS S3): delivered REST APIs, integrated them with the React frontend, and added S3 storage for secure file uploads. [hyphn.tech](#)

PROJECTS

JavaBank | *Java 17, Spring Boot, Spring Security, Spring Data JPA, MySQL, Docker* [Live](#) · [Code](#)

- Built a full stack banking app with account opening, a web ATM, UPI-style payments with QR codes and PIN, loans with EMI schedules, and a staff admin panel.
- Engineered safe money movement with BigDecimal arithmetic, @Transactional transfers, pessimistic row locking and an append-only ledger; integrated live NAVs for 17 mutual funds with caching (~0.2s page loads).

RaktFlow | *React, TypeScript, Zustand, React Router, Tailwind CSS, Leaflet* [Live](#) · [Code](#)

- Designed a blood delivery platform prototype for 37 cities with flows for families, hospitals and operations staff, live map tracking, and an ops console with urgency scoring and nearest-rider auto-dispatch.

Cyberfriction | *React 19, GSAP, Three.js, GLSL, Vite* [Live](#) · [Code](#)

- Optimized a scroll-driven site's 300-frame sequence from 70 MB to 17.7 MB (~75%) with WebP and progressive loading, rendered through a custom GLSL shader.
